

Maruff Shadu

Senior Full-Stack Software Engineer

Lagos, Nigeria | olayemey@gmail.com | +234 813 809 1650 | linkedin.com/in/maruff-shadu

Professional Summary

Senior full-stack software engineer with over five years of hands-on experience designing, building, and maintaining scalable web applications. Proven ability to own complex systems end-to-end, from backend architecture and cloud deployment to frontend integration and CI/CD automation. Strong background in TypeScript, Node.js, Firebase, and PHP (Laravel), with deep experience in role-based systems, real-time data workflows, secure financial operations, and cloud-native architectures. Adept at translating business requirements into reliable, maintainable, and production-ready software.

Technical Skills

Programming Languages: TypeScript, JavaScript, PHP

Frameworks & Libraries: Node.js, React, Laravel

Cloud & Backend Services: Firebase Auth, Firestore, Cloud Functions, Storage, AWS, DigitalOcean

Databases: Firestore, MySQL, MongoDB

DevOps & Deployment: Docker, Git, GitHub, CI/CD Pipelines

System Design: Role-Based Access Control (RBAC), Event-Driven Architecture, Real-Time Systems

Integrations: Twilio (WhatsApp), Email Notification Services

Professional Experience

Full-Stack Software Engineer — Shoppermayor Logistics (Feb 2024 – Present)

- Architected and delivered a production-grade logistics management platform supporting Admin, Manager, Support, and User roles with clearly defined permissions and workflows.
- Designed secure authentication and authorization using Firebase Auth, Firestore security rules, and server-side Cloud Functions to enforce access control.
- Built a dynamic invoicing and digital wallet system enabling invoice generation, package consolidation, custom pricing, and wallet-based payments.
- Implemented real-time notifications across dashboards using Firestore snapshots, ensuring immediate system feedback without page reloads.
- Developed backend automation with Cloud Functions for email notifications, admin alerts, and WhatsApp notifications via Twilio.
- Centralized system configuration through admin-controlled settings for notifications, exchange rates, maintenance mode, and role privileges.
- Established CI/CD pipelines to automate build and deployment processes, improving release reliability and reducing manual errors.

Full-Stack Developer / Technical Instructor — Cyclobold Technology (Jul 2020 – Jan 2024)

- Designed and built multiple full-stack web applications using Node.js, PHP, and modern JavaScript frameworks for real-world business use cases.
- Developed RESTful APIs and backend services with emphasis on security, performance, and maintainability.
- Mentored and trained over 50 students and junior developers, focusing on practical software engineering principles and production-ready development.
- Introduced version control workflows, CI/CD practices, and deployment strategies to improve engineering discipline and code quality.

Selected Projects

Multi-Role Logistics Management Platform

- End-to-end system for managing users, shipments, invoicing, wallets, referrals, and notifications.
- Implemented real-time dashboards, secure financial workflows, and cloud-based backend automation.
- Designed reusable frontend components to support multiple roles with minimal duplication.

Education

B.Sc. Telecommunication Science — University of Ilorin (2017)

Diploma in Software Engineering — Flammytech (2020)

Diploma in Computer Science — Kwara State Polytechnic (2013)

Certifications

Full-Stack Web Development

Certified DevOps Engineer
